## MA 10 Learning Guides

## What Am I Going To Learn?

Welcome to Foundations of Math \& Precalculus 10! Our goal at Frances Kelsey is to help you become familiar with the material in Math 10.

- Keep in contact with your marking teacher.
- Work with a partner.
- Work on Math in the Math Work Area!

## What Will I Do?

- Get a LG lesson
- Mark my work.
- Go over any problems with my teacher

## What Do I Need To Start?

To complete this Math course you will need:
Text: Foundation \& Pre-calculus Math 10 (Pearson)
Worksheets: See Resource Package
Equipment: Scientific calculator Loose-leaf note book with dividers Graph Paper

## What Do The Guides Look Like?

- How many guides? $\mathbf{1 8}$
- What is in the guide?
- Reading assignments (pre-learning)
- Exercises.
organized by $\mathbf{A} / \mathbf{B} / \mathbf{C}$ levels of difficulty to check your skills and understanding

## What Should My Binder Look Like?

Marks
Keep track of your scores.
Notes Any notes or LG overviews.
Practice
Glossary Includes new terms and definitions.

## MA 10 Learning Guides

## What Do The Tests Look Like?

- Multiple Choice
- Short Answer
- Solve and Describe.

## How Is The Course Weighted?

| $\mathbf{8 0 \%}$ | Learning Guides 1-18 |
| :--- | :--- |
| $\mathbf{2 0 \%}$ | Provincial Exam |

## How Are The Guides Weighted?

| $\mathbf{2 0 \%}$ | Seminar Participation <br> Flex Block participation <br> LG Homework |
| :--- | :--- |
| $\mathbf{8 0 \%}$ | LG Test (or alternate assessment) |

## How Do I Get Test Permission?

- attending the LG seminar
- taking notes on the LG
- attending and working in flex blocks
- doing the work in the LG and -marking it
- doing the review package questions,
- studying
- get green slip signed

## How Else Can I Show What I Know?

All alternate forms of assessment must explain each Learning Guide Expectations and give an original example with a detailed step-by-step explanation.

Some forms of alternate assessment are:

- Make a booklet or poster,
- Produce a video,
- Do an oral presentation
- Make up your own evaluation

How Can I Be Successful In Math 10?

- attend at least 2 regular classes per week
- attend 2 flex blocks per week
- work in the Math Area
- do homework in this course
- finish the course in 5 months
- finish each Learning Guide in one week
- ask for help!
- work with a partner
- 3 rewrites are possible

## MA 10 Learning Guides

## What Are These Guides About?

- You can use proportional reasoning to convert measurements.
- The volume of a right pyramid or cone is related to the volume of the enclosing right prism or cylinder.
- The surface area of a right pyramid or cone is the sum of the areas of the faces and the curved surfaces.
- The surface area of a sphere is related to the curved surface area of the enclosing area.

## What New Words Should I Learn?

(These definitions should be added to your Math Journal Glossary)

SI System of Measurement
Referent
Unit Analysis
Apex
Right Cone
Lateral Area

Imperial Units
Conversion Factor
Proportion
Right Pyramid
Slant Height
Sphere

## MA 10 Learning Guides

## What Am Going to Learn in LG 1?

After this guide you should be able to do the following:

### 1.1 Imperial Measures of Length

Which imperial unit is the most appropriate to measure the length of a car?

How many 20 inch pieces can be cut from board 8 feet long?
1.3 Relating SI and Imperial Units

Convert 10 inches to centimeters.

Convert 80 centimeters to feet and the nearest inch.

Write a proportion to convert 4.2 meters to feet.

Megan is 5 foot 4 inches and Emily is 167 centimeters. Who is taller?

## What Should I Do?

### 1.1 Imperial Measures of Length

Read Pages p. 7-10

|  | Questions |  |
| :---: | :---: | :---: |
| A | $\begin{aligned} & \text { p. } 11 \text { \#3, 5a, 6ab, } 7 \\ & \text { p. } 11 \# 8,9,11,12,13,15 \mathrm{a}, 16,18 \\ & \text { p. } 12 \# 19,20,22 \end{aligned}$ | 20 min . |
| B |  | 30 min . |
| C |  | 10 min . |

### 1.3 Relating SI and Imperial Units

## Read Pages p. 18-21

| Practice Questions |  |  |
| :---: | :--- | :--- |
| $\mathbf{A}$ | p. $22 \# 4,5,6$ | 25 min. |
| $\mathbf{B}$ | p. $22 \# 7 \mathrm{a}, 8,9,10,11,13 \mathrm{a}, \mathrm{b}$ | 20 min. |
| C | p. $23 \# 15,17$ | 10 min. |

## Checkpoint 1 (p. 24-5)

Review the Connections and Concept Development sections and then try the following Assess Your Understanding questions:

| $\mathbf{1 . 1}$ | p. $25 \# 1,3,4$ | 15 min. |
| :---: | :--- | :--- |
| $\mathbf{1 . 3}$ | $\mathrm{p} .25 \# 7,8$ |  |

## Am I ready to move on?

Bring your marked guide and checkpoint work with you when you come to get permission for the LG 1 Quiz.

## MA 10 Learning Guides

## What Am Going to Learn in LG 2?

After this guide you should be able to do the following:

### 1.4 Surface Areas of Right Pyramids \& Right Cones

Find the surface area of the right pyramid below:

Find the surface area of the right cone below:

Given the volume of the right cone below is $200 \mathrm{~cm}^{3}$, find the radius to the nearest cm .

### 1.5 Volumes of Right Pyramids \& Right Cones

Find the volume of the right pyramid below:

Find the volume of the right cone below:

### 1.6 Surface Area and Volume of a Sphere

Find the surface area of the sphere below:

Find the volume of the sphere below:

## MA 10 Learning Guides

### 1.7 Solving Problems Involving Objects

Find the volume of the composite figure below:

8 cm

## What should I do?

1.4 Surface Areas of Right Pyramids \& Right Cones

Read Pages p. 26-33

## Worksheet

Do LG 2 worksheet on Pythagoras
30 min .

| $\left\lvert\,$Practice Questions   <br> A p. $34 \# 4,5,6,7,8$ 30 min. <br> $\mathbf{B}$ p. $34 \# 9,10,13,15,16$ 30 min. <br> C p. $35 \# 20$ 5 min. l\right. |
| :--- |

1.5 Volumes of Right Pyramids \& Right Cones

Read Pages p. 36-41

## Practice Questions

| $\mathbf{A}$ | p. $42 \# 4,6,8,9$ | 25 min. |
| :--- | :--- | :--- |
| B | p. $42 \# 10,11,15,16,18$ | 35 min. |
| C | p. $43 \# 21$ | 10 min. |

### 1.6 Surface Area and Volume of a Sphere

## Read Pages p. 45-50

## Practice Questions

| $\mathbf{A}$ | p. $51 \# 3,4,5$ | 25 min. |
| :--- | :--- | :--- |
| $\mathbf{B}$ | p. $51 \# 7,8,11,13 \mathrm{abc}, 17 \mathrm{a}, 18$ | 35 min. |
| $\mathbf{C}$ | p. $52 \# 23,24$ | 10 min. |

1.7 Solving Problems Involving Objects

Read Pages p. 55-58

## Practice Questions

| $\mathbf{A}$ | p. $59 \# 3$ | 20 min. |
| :--- | :--- | :--- |
| $\mathbf{B}$ | p. 59 \#5, 6, 9a, 10 | 20 min. |

## Am I ready to move on?

Read the Study Guide on pages $62 \& 63$.

## Review (p.64)

Try the following review question

| $\mathbf{1 . 1}$ | p. $64 \# 1,3,4$ |  |
| :---: | :--- | :--- |
| $\mathbf{1 . 3}$ | p. $64 \# 6,7,8$ |  |
| $\mathbf{1 . 4}$ | p. $64 \# 9,10,12$ | 60 min. |
| $\mathbf{1 . 5}$ | p. $65 \# 15.17 .19$ |  |
| $\mathbf{1 . 6}$ | p. $66 \# 20,21,22,23$ |  |
| $\mathbf{1 . 7}$ | p. $66 \# 25,27$ |  |

Optional Practice Test (p.64)

| p. 67 \#1, 2, 3, 4, 6 | 20 min. |
| :--- | :--- |

## How Do I Show My Understanding?

Bring your marked guide work for LG $1 \& 2$ and review package with you when you come to get test permission.

## MA 10 Learning Guides

## What Are These Guides About?

- The ratio of any two sides remains constant even if the triangle is enlarged or reduced.
- You can use the ratio of the lengths of two sides to determine the measure of one of the acute angles.
- You can use the length of one side and the measure of an acute angle to determine the length of another side of the triangle.

## What New Words Should I Learn?

(These definitions should be added to your Math Journal Glossary)

Angle of Inclination
Tangent Ratio
Opposite Side
Indirect Measurement
Cosine Ratio

Angle of Depression
Hypotenuse
Adjacent Side
Sine Ratio

## MA 10 Learning Guides

## What Am Going to Learn in LG 3?

After this guide you should be able to do the following:

### 2.1 The Tangent Ratio

Label the Opposite and Adjacent sides in the triangle below then state the Tangent ratio:

Find the indicated angle in the right triangle below:

To the nearest degree, determine the measure of $<x$ for each value of Tan $x$.
a) $\operatorname{Tan} \mathrm{x}=0.125$
b) $\operatorname{Tan} \mathrm{x}=\frac{1}{2}$

### 2.2 Using the Tangent Ratio to Calculate Lengths

Find the indicated side in the right triangle below.

## What should I do?

### 2.1 The Tangent Ratio

## Read Pages p. 70-74

## Worksheet

| Do LG 3 worksheet on Similar <br> Triangles | 15 min. |
| :--- | :--- | :--- |

| Practice Questions |  |  |
| :---: | :---: | :---: |
| A | $\begin{aligned} & \text { p. } 75 \text { \#3, 4, } 5 \\ & \text { p. } 75 \text { \#6abc, } 8,9 \mathrm{ab}, 10 \mathrm{ac}, 11 \mathrm{ab}, \\ & 13,15,16,19 \\ & \text { p. } 76 \text { \#21 } \end{aligned}$ | 20 min . |
| B |  | 45 min . |
| C |  | 5 min . |

### 2.2 Using the Tangent Ratio to Calculate Lengths

## Read Pages p. 78-81

## Practice Questions

| $\mathbf{A}$ | p. $81 \# 3,4,5$ | 25 min. |
| :--- | :--- | :--- |
| $\mathbf{B}$ | p. $82 \# 6,7,9,10,11$ | 25 min. |
| $\mathbf{C}$ | p. $83 \# 15$ | 10 min. |

## Checkpoint 1 (p. 87-8)

Review the Connections and Concept Development sections and then try the following Assess Your Understanding questions:

| $\mathbf{2 . 1}$ | $\mathrm{p} .88 \# 1,2,3$ | 30 min. |
| :--- | :--- | :--- |
| $\mathbf{2 . 2}$ | $\mathrm{p} .88 \# 4,5$ | 3 |

## Am I ready to move on?

Bring your marked guide and checkpoint work with you when you come to get permission for the LG 3 Quiz.

## MA 10 Learning Guides

## What Am Going to Learn in LG 4?

After this guide you should be able to do the following:

### 2.4 The Sine and Cosine Ratios

Label the Opposite and Adjacent sides in the triangle below then state the Sin \& Cos ratios:

Find the indicated angle in the right triangle below:

To the nearest degree, determine the measure of $<\mathrm{x}$ for each ratio.
a) $\operatorname{Sin} x=0.125$
b) $\quad \operatorname{Cos} x=\frac{1}{2}$

### 2.5 Using the Sin \& Cos Ratios to Calculate Lengths

Find the indicated side in the right triangle below.

## Student Directions

### 2.4 The Sine and Cosine Ratios

Read Pages p. 89-94

| Practice Questions |  |  |
| :---: | :---: | :---: |
| A | p. 95 \#4, 5, 6 | 20 min . |
| B | p. 95 \#7, 9,10 ab 11, 12, 14, 15, | 30 min . |
| C | p. 96 \#17 | 5 min . |

### 2.5 Using the Sin \& Cos Ratios to Calculate Lengths

## Read Pages p. 97-100

$\left\lvert\,$| Practice Questions |  |  |
| :--- | :--- | ---: |
| A p. $101 \# 3,4$ 25 min. <br> B p. $101 \# 5,6,7,8,9,10,12 \mathrm{a}$ 45 min. <br> C p. $102 \# 14$ 5 min. |  |  | |  |
| :--- |\right.

## Checkpoint 2 (p. 103-4)

Review the Connections and Concept Development sections and then try the following Assess Your Understanding questions:

| $\mathbf{2 . 4}$ | p. $104 \# 1,2,3 \mathrm{a}$ | 30 min. |
| :--- | :--- | :--- |
| $\mathbf{2 . 5}$ | p. $104 \# 4,5$ |  |

## Am I ready to move on?

Bring your marked guide and checkpoint work with you when you come to get permission for the LG 4 Quiz.

## MA 10 Learning Guides

## What Am Going to Learn in LG 5?

After this guide you should be able to do the following:

### 2.6 Applying the Trigonometric Ratios

Solve the following right triangle below given 2 sides:

Solve the following right triangle below given one side and one acute angle:

Find the perimeter of the following triangle using trigonometric ratios.

2.7 Solving Problems More than One Right Triangle Calculate a side length CD using more than one right triangle.

## Student Directions

### 2.6 Applying the Trigonometric Ratios

## Read Pages p. 105-110

| Practice Questions |  |  |
| :---: | :---: | :---: |
| A | $\begin{aligned} & \text { p. } 111 \text { \#3, 4, } 5 \\ & \text { p. } 111 \text { \#6abc, } 7,8,10,11,12 \\ & \text { p. } 112 \text { \#16 } \\ & \hline \end{aligned}$ | 25 min . |
| B |  | 25 min . |
| C |  | 5 min . |

### 2.7 Solving Problems More than One Right Triangle

## Read Pages p. 113-117

## Practice Questions

| $\mathbf{A}$ | p. 118 \#3abc, 4 | 25 min. |
| :---: | :--- | :--- |
| $\mathbf{B}$ | p. $118 \# 5 \mathrm{abc}, 6,8,9,11,13,14$ | 35 min. |

## Am I ready to move on?

Read the Study Guide on pages 122 \& 123 .

## Review (p.124-6)

Try the following review question

| 2.1 | p. $64 \# 1,3,4,5$ |  |
| :--- | :--- | :--- |
| 2.2 | p. $64 \# 6,7,8$ |  |
| 2.4 | p. $64 \# 11,12 \mathrm{a}, 13,14$ | 60 min. |
| 2.5 | p. $65 \# 15.16,17$ |  |
| 2.6 | p. $66 \# 18,20,21$ |  |
| 2.7 | p. $66 \# 22,23$ |  |

Optional Practice Test (p.127)

| p. $67 \# 1,2,4,5,6$ | 30 min. |
| :--- | :--- |

## How Do I Show My Understanding?

Bring your marked guide work for LG 3, 4 \& 5 and review package with you when you come to get test permission.

## MA 10 Learning Guides

## What Are The Big Ideas?

- Arithmetic operations on polynomials are based on the arithmetic operations on integers and have similar properties.
- Multiplying and factoring are inverse processes, and a rectangle diagram can be used to represent them.

## What New Words Should I Learn?

(These definitions should be added to your Math Journal Glossary)

| Prime Factorization | Greatest Common Factor |
| :--- | :--- |
| Least Common Multiple | Perfect Cube |
| Cube Root | Radicand |
| Radical | Index |
| Difference of Squares | Perfect Square Trinomial |

Factoring by Decomposition

## MA 10 Learning Guides

## What Am Going to Learn in LG 6?

After this guide you should be able to do the following:

### 3.1 Factors and Multiples of Whole Numbers

Write 120 as a product of prime factors.

Find the greatest common factor of 54 and 72.

Find the least common multiple of 24,32 and 48
3.2 Perfect Squares, Perfect Cubes, and Their Roots

Find the square root of 400 using prime factors.

Use factoring to determine whether 4096 is a perfect square or perfect cube.

Determine the edge length of the following square:

Determine the edge length of the following cube:

## MA 10 Learning Guides

## What Should I Do?

3.1 Factors and Multiples of Whole Numbers

Read Pages p. 134-139

| $\|$$\|$$\|l\|$ <br> Practice Questions <br> A p. $140 \# 3,4,5$ <br> B <br> p. $140 \# 6 \mathrm{ace}, 8 \mathrm{ace}, 9 \mathrm{ab}, 10 \mathrm{ace}$, <br> $11 \mathrm{ac}, 15 \mathrm{ab}, 16 \mathrm{ac}, 19 \mathrm{a}, 20 \mathrm{a}$ |
| :--- |

3.2 Perfect Squares, Perfect Cubes, and Their Roots

Read Pages p. 142-146

## Practice Questions

| A | p. $146 \# 4,5$ (use prime factoring) | 15 min. |
| :---: | :--- | ---: |
| B | p. $146 \# 6 \mathrm{abc}, 7,8,10,12 \mathrm{a}$ | 15 min. |
| $\mathbf{C}$ | p. $147 \# 17$ | 5 min. |

| Worksheet |
| :--- | :--- |
| Do the LG 6 worksheet on polynomial <br> operations. 30 min. |

### 3.3 Common Factors of a Polynomial <br> Read Pages p. 150-154

## Practice Questions

| $\mathbf{A}$ | p.155 \#5, 6 |  |
| :---: | :---: | :---: |
| $\mathbf{B}$ | p. 155 \#7ace*, 8abd, 9ace*, <br> 10ace, 11, 14, 15, 16abc, 17 | 15 min. <br> 45 min. l |

* don't use tiles

### 3.5 Polynomials of the Form $x^{2}+b x+c$

Read Pages p. 159-165

## Practice Questions

| $\mathbf{A}$ | p.166 \#4, 5*, 6abc, 7b |  |
| :---: | :--- | :---: |
| B | p. 166 \#8a, 10, 11, 13, 14aceg, <br> 15aceg, 17, 19abd, ce | 20 min. |
| $\mathbf{C}$ | 30 min. |  |
| p. 167 \#23a |  |  |

* don't use tiles
3.6 Perfect Squares, Perfect Cubes, and Their Roots

Read Pages p. 168-176

## Practice Questions

| A | $\begin{array}{\|l\|} \hline \text { p. } 177 \text { \#5, 6ace*, } 7 \\ \text { p. } 177 \text { \#8, 9ace, 10bce, 12, } \\ \text { 13aceg, 15aceg, 16, 18abc, } \\ \text { 19aceg, 20a } \\ \text { p. } 178 \text { \#21a, 22a } \\ \hline \end{array}$ | 15 min . |
| :---: | :---: | :---: |
| B |  | $45 \mathrm{~min} .$ |
| C |  | 15 min . |

* don't use tiles

## Checkpoint 1 (p. 148-9)

Review the Connections and Concept Development sections and then try the following Assess Your Understanding questions:

| $\mathbf{3 . 1}$ | p.149 \#1ab, 2ab, 3ab, 4ab | 30 min.$$ |
| :--- | :--- | :--- |
| $\mathbf{3 . 2}$ | $\mathrm{p} .149 \# 6-8(\mathrm{abc}), 9 \mathrm{a}$ |  |

## Checkpoint 2 (p. 179-81)

Review the Connections and Concept Development sections and then try the following Assess Your Understanding questions:

| $\mathbf{3 . 3}$ | p. $180 \# 1,2$ (use alg. tiles i, iv) |  |
| :--- | :--- | :--- |
| $\mathbf{3 . 5}$ | p. $180 \# 5,6,7$ | 45 min. |
| $\mathbf{3 . 6}$ | p. $181 \# 8 \mathrm{acf}, 9 \mathrm{acf}$ |  |

## Am I ready to move on?

Bring your marked guide and checkpoint work with you when you come to get permission for the in-class LG 6 Quiz.

## MA 10 Learning Guides

## What Am Going to Learn in LG 7?

After this guide you should be able to do the following:

### 3.7 Multiplying Polynomials

Expand and simplify: $(\mathrm{x}+1)\left(\mathrm{x}^{2}+3 \mathrm{x}+2\right)$

Expand and simplify: $(5 x+6)(5 x+6)$

Expand and simplify: $(2 x+7)(2 x-7)$

Expand and simplify: $\left(x^{2}-3 x+5\right)\left(x^{2}+2 x-1\right)$

### 3.7 Factoring Special Products

Factor: $x^{2}+12 x+36$

Factor: $4 x^{2}-25 y^{2}$

Factor: $8 x^{2}-72 y^{2}$

## What should I do?

3.7 Multiplying Polynomials

Read Pages p. 182-185

| $\|$Practice Questions   <br> A p. 186 \#4ac, 5bef  <br> B p. 186 \#6a (i, ii, v, vi), 7a, 8ac, <br> $9 \mathrm{ad}, 10 \mathrm{ab}, 11,13 \mathrm{ac}, 15 \mathrm{adf}$, <br> 17 a 45 min. <br> C p. 187 \#18ab, 19ace, 20, 21acd,  |
| :--- |

### 3.8 Factoring Special Polynomials

Read Pages p. 188-193

## Practice Questions

| A | $\begin{aligned} & \text { p. } 194 \text { \#4aceg, } 5,6 \\ & \text { p. } 194 \text { 7a, 8acfacc, 10ace, } 11 \text { ace, } \\ & \text { 12, 13, 15a, } 18 \\ & \text { p. } 195 \text { \#19a, 20, 21 } \end{aligned}$ | 20 min . |
| :---: | :---: | :---: |
| B |  | 45 min . |
| C |  | 20 min . |

## Am I ready to move on?

Read the Study Guide on pages 196 \& 197.

## Review (p.198)

Try the following review question

| $\mathbf{3 . 1}$ | p. 198 \#1ac, 2ac, 3, 5ad |  |
| :--- | :--- | :--- |
| $\mathbf{3 . 2}$ | p. 198 \#6-10 |  |
| $\mathbf{3 . 3}$ | p. $199 \# 11-14,15 \mathrm{ab}^{*}, 16 \mathrm{ab*}$ |  |
| $\mathbf{3 . 5}$ | p. $199 \# 18,19,20 \mathrm{a}, 21$ |  |
| $\mathbf{3 . 6}$ | p. 199 \#23 |  |
| $\mathbf{3 . 7}$ | p. 200 \#27ab, 28ab, 29a, 30 |  |
| $\mathbf{3 . 8}$ | p. $200 \# 32-35$ |  |

* use algebra tiles

## Optional Practice Test (p.201)

## How Do I Show My Understanding?

Bring your marked guide work for LG 6 \& 7 and review package with you when you come to get test permission.

## MA 10 Learning Guides

## What Are The Big Ideas?

- Any number that can be written in the fraction $m / n, n \neq 0$, where $m$ and $n$ are integers, is rational.
- Exponents can be used to represent roots and reciprocals of rational numbers.
- The exponent laws can be extended to include powers with rational and variable bases, and rational exponents.

## What New Words Should I Learn?

(These definitions should be added to your Math Journal Glossary)

Irrational Number
Entire Radical

Real Number
Mixed Radical

## MA 10 Learning Guides

## What Am Going to Learn in LG 8?

After this guide you should be able to do the following:

### 4.1 Estimating Roots

Evaluate the following:
a) $\sqrt{49}$
b) $\sqrt[3]{-64}$

Evaluate $\sqrt{18}$ and explain the strategy you used.

### 4.2 Irrational Numbers

Rational or Irrational?
a) $\sqrt{\frac{4}{25}}$
b) $\sqrt[3]{25}$

Locate $\sqrt{8}$ on a number line.

### 4.3 Mixed and Entire Radicals

Write each radical in simplest form:
a) $\sqrt{24}$
b) $\sqrt{48}$

Write each radical in simplest form:
a) $\sqrt[3]{128}$
b) $\sqrt[3]{128}$

Write each mixed radical as an entire radical:
a) $3 \sqrt{5}$
b) $-2 \sqrt{6}$

## What should I do?

4.1 Estimating Roots

Read Pages p. 204-205

\section*{Practice Questions <br> | A | p.206 \#1-3 use calc., 5 | 15 min. |
| :--- | :--- | :--- |}

### 4.2 Irrational Numbers

Read Pages p. 207-210

| $\left\lvert\,$$\|l\|$ <br> Practice Questions <br> $\mathbf{A}$ <br> p. $211 \# 3,4$ <br> $\mathbf{B}$ $\mathrm{p} .212 \# 6\right.,7,8,11,12,14,15$, |
| :--- |

### 4.3 Mixed and Entire Radicals

Read Pages p. 213-217

## Practice Questions

| A | $\begin{aligned} & \text { p. } 218 \text { \#3, } 4,5 \\ & \text { p. } 218 \text { \#9, 10acegi, 11acegi, } \\ & \text { 12acegi, 14, 15, 16, 17, 18, } \\ & \text { 2, 22a } \\ & \text { p. } 219 \text { \#25 } \end{aligned}$ | 15 min . |
| :---: | :---: | :---: |
| B |  | $45 \mathrm{~min} .$ |
| C |  | 5 min . |

## Checkpoint 1 (p. 220-1)

Review the Connections and Concept Development sections and then try the following Assess Your Understanding questions:

| $\mathbf{4 . 1}$ | p.221 \#1,2 |  |
| :--- | :--- | :--- |
| $\mathbf{4 . 2}$ | p. $221 \# 4,5,6 \mathrm{a}, 7,8$ | 30 min. |
| $\mathbf{4 . 3}$ | p. $221 \# 9,11$ |  |

## Am I ready to move on?

Bring your marked guide and checkpoint work with you when you come to get permission for the LG 8 Quiz.

## MA 10 Learning Guides

## What Am Going to Learn in LG 9?

After this guide you should be able to do the following:

### 4.4 Fractional Exponents and Radicals

Evaluate the following:
a) $8^{\frac{1}{3}}$
b) $16^{\frac{1}{4}}$

Write each radical as a power:
a) $\sqrt{49}$
b) $\sqrt[3]{-64}$

Write each power as a radical:
a) $5^{\frac{2}{3}}$
b) $4^{\frac{1}{4}}$

Evaluate the following:
a) $\left(\frac{8}{27}\right)^{\frac{1}{3}}$
b) $\left(\frac{9}{16}\right)^{\frac{3}{2}}$
4.5 Negative Exponents and Reciprocals

Write using positive exponents:
a) $\frac{3^{-1}}{5}$
b) $\frac{3^{-1}}{5}$

Evaluate the following without a calculator:
a) $8^{-\frac{1}{3}}$
b) $16^{1.5}$

### 4.6 Applying the Exponent Laws

Simplify:
a) $\left(x^{2}\right)\left(x^{3}\right)$
b) $\left(x^{5}\right) \div\left(x^{2}\right)$

Simplify:
a) $\left(x^{2}\right)^{3}$
b) $\left(x^{-2}\right)^{-3}$

Simplify: $\left(\frac{2 b^{3}}{3 c^{3}}\right)^{2}$

Simplify: $\left(\frac{8 x^{-2} y^{3}}{-12 x^{3} y^{-1}}\right)^{-1}$

## MA 10 Learning Guides

## Am I ready to move on?

Read the Study Guide on pages $244 \& 245$.

## Review (p.246-8)

Try the following review question

| 4.1 | p. 246 \#1, $3^{*}, 4,5$ | 60 min . |
| :---: | :---: | :---: |
| 4.2 | p. 246 \#6-9 (all) |  |
| 4.3 | p. 246 \# 11, 12, 14, 15ac |  |
| 4.4 | p. 247 \# 16, 17, 19*, 21, 22 |  |
| 4.5 | p. 247 \#24*, 25, 28, 29 |  |
| 4.6 | p. 248 \#30,32 |  |

* use calculator

| Optional Practice Test (p.249) |  |  |
| :--- | :--- | :--- |
|  | p.249 \#1-8 (all) | 15 min. |

## How Do I Show My Understanding?

Bring your marked guide work for LG 8 \& 9 and review package with you when you come to get test permission.

## MA 10 Learning Guides

## What Are These Guides About?

- A relation associates the elements of one set with the elements of another set.
- A function is a special type of relation for which each element of the first set is associated with a unique element of the second set.
- A linear function has a constant rate of change and its graph is a non-vertical straight line.

## What New Words Should I Learn?

| (These definitions should be added to your Math Journal Glossary) |  |
| :--- | :--- |
| Relation | Arrow Diagram |
| Function | Domain |
| Range | Function Notation |
| Rate of Change | Linear Function |
| Vertical Intercept | Horizontal Intercept |

## MA 10 Learning Guides

## What Am Going to Learn in LG 10?

After this guide you should be able to do the following:

### 5.1 Representing Relations

Create an arrow diagram for the following graph:

5.2 Properties of Functions

Write in function notation:
$\mathrm{C}=2.5 \mathrm{x}+200$

Write as an equation in two variables:
$\mathrm{D}(\mathrm{t})=5 \mathrm{t}-2$

Determine which of the following are functions:
a) $(1,2),(2,4),(3,6),(4,8)$
b) $(1,2),(1,4),(1,6),(1,8)$

## What should I do?

5.1 Representing Relations

Read Pages p. 256-261

$\left\lvert\,$| $\|l\|$ |  |  |
| :--- | :---: | :---: |
| Practice Questions |  |  |
| A |  |  |
| A |  |  |
| B $262 \# 3,4$ |  |  |
| p. $262 \# 5,6 \mathrm{ab}, 7 \mathrm{ab}, 9,10$ |  |  |
| C |  |  | $\mathrm{p} .263 \# 13\right.,14$

| Worksheet |  |  |
| :--- | :--- | :---: |
| Do the LG 10 worksheet on graphing <br> linear equations | 30 min. |  |

5.2 Properties of Functions

Read Pages p. 264-270

| Practice Questions |  |  |
| :---: | :---: | :---: |
| A | $\begin{array}{\|l} \hline \text { p. } 270 \# 4,5,6,7 \\ \text { p. } 262 \# 8,9 \mathrm{a}, 10 \mathrm{ab}, 12,14,15, \\ 16,17,19 \\ \text { p. } 263 \# 20,21 \end{array}$ | 15 min . |
| B |  | 25 min . |
| C |  | 5 min . |

## Checkpoint 1 (p. 274-5)

Review the Connections and Concept
Development sections and then try the following Assess Your Understanding questions:

| $\mathbf{5 . 1}$ | p.275 \#1 | 15 min. |
| :--- | :--- | :--- |
| $\mathbf{5 . 2}$ | p.221 \#2,4 |  |

## Am I ready to move on?

Bring your marked guide and checkpoint work with you when you come to get permission for the LG 10 Quiz.

## MA 10 Learning Guides

## What Am Going to Learn in LG 11?

After this guide you should be able to do the following:

### 5.3 Interpreting and Sketching Graphs

Jaiden went for a run. Describe her run in each segment of the graph:

5.5 Graphs of Relations and Functions

Which are functions? State the domain and range.
a)

b)

### 5.6 Properties of Linear Relations

Which are functions? State the domain and range.
a)

| x | 0 | 2 | 4 | 6 | 8 |
| :--- | :--- | :--- | :--- | :--- | :--- |
| y | 8 | 6 | 4 | 2 | 0 |

b)

$$
\begin{array}{l|lllll}
\mathrm{x} & 0 & 1 & 2 & 3 & 4 \\
\hline \mathrm{y} & 0 & 1 & 4 & 9 & 16
\end{array}
$$

Create a table of values and graph $y=2 x+3$
5.7 Interpreting Graphs of Linear Functions

Sketch a graph of the following linear function:
$f(x)=4 x-2$

The graph shows the area covered by paint:

$$
\begin{aligned}
& \text { Volume (L) }
\end{aligned}
$$

What is the rate of change?
What area will be covered by 8 L ?

## Student Directions

5.3 Interpreting and Sketching Graphs

Read Pages p. 276-280

## Practice Questions

| $\mathbf{A}$ | p. 281 \#3 | 5 min. |
| :---: | :--- | :---: |
| $\mathbf{B}$ | p. $281 \# 4-10($ all $), 13,14$ | 30 min. |
| $\mathbf{C}$ | p. $283 \# 16,17$ | 10 min. |

### 5.5 Graphs of Relations and Functions

## Read Pages p. 287-293

## Worksheet <br> Do the LG 11 worksheet on graphing 30 min .

## Practice Questions

| A | $\begin{array}{\|l} \hline \text { p. } 294 \text { \#4-7 (all) } \\ \text { p. } 294 \text { \#8, } 9,10,11,12 \mathrm{a}, 16,17, \\ 19 \\ \text { p. } 297 \# 22 \end{array}$ | 10 min . |
| :---: | :---: | :---: |
| B |  | 20 min . |
| C |  | 5 min . |

### 5.6 Properties of Linear Relations

## Read Pages p. 300-307

## Practice Questions

| A | p. 308 \#4, 5 | 15 min . |
| :---: | :---: | :---: |
| B | p. 308 \#6, 7, 9, 12, 14, 16, 17 | 30 min . |
| C | p. 310 \#18-20 (all) | 10 min . |

### 5.7 Interpreting Graphs of Linear Functions

## Read Pages p. 311-318

| Practice Questions |  |  |
| :---: | :---: | :---: |
| A | p. 319 \#4, 5 | 10 min . |
| B | p. 319 \#6ab (i,iii, iv,v), 7, 9, 10, $12,14,15 \mathrm{a}, 16,17 \mathrm{a}$ | 30 min . |
| C | p. 322 \#20 | 5 min . |

## MA 10 Learning Guides

## Am I ready to move on?

Read the Study Guide on pages 324 \& 325 .

## Review (p.326-8)

Try the following review question

| $\mathbf{5 . 1}$ | p.326 \#1, |  |
| :--- | :--- | :--- |
| $\mathbf{5 . 2}$ | p.326 \#3-5 (all) |  |
| $\mathbf{5 . 3}$ | p.326 \#6a, 7 |  |
| ${$$} }$ | p.327 \#9-12 (all) | 45 min. |
| ${$$} }$ | p.327 \#13, 14ab (i,iii, iv,v), |  |
| $\mathbf{5 . 7}$ | p.328 \#17,18 |  |

Optional Practice Test (p.249)

|  | p.329 \#1-5 (all) | 20 min. |
| :--- | :--- | :--- |

## How Do I Show My Understanding?

Bring your marked guide work for LG 10 \& 11 and review package with you when you come to get test permission.

## MA 10 Learning Guides

## What Are These Guides About?

- The graph of a linear function is a non-vertical straight line with a constant slope.
- Certain forms of the equation of a linear function identify the slope and y-intercept of the graph or the slope and the coordinates of a point on the graph.

## What New Words Should I Learn?

(These definitions should be added to your Math Journal Glossary)

| Slope | Rise |
| :--- | :--- |
| Run | Negative reciprocals |
| Slope-intercept form | Slope-point form |
| General form |  |

## MA 10 Learning Guides

## What Am Going to Learn in LG 12?

After this guide you should be able to do the following:

### 6.1 Slope of a Line

Find the rise, run and the slope of the following:

Draw a line segment with a slope of $\frac{2}{3}$ that has one endpoint on the origin.

Determine the slope of the line that passes through the following points: $(-2,3) \&(4,-1)$.
6.2 Slopes of Parallel and Perpendicular Lines

For the pair of lines at the right, determine whether the lines are parallel, perpendicular or neither.

Find a slope parallel to a line with slope $\frac{2}{3}$.

Find a slope perpendicular to a line with slope $\frac{2}{3}$.

Determine whether the slopes of the following pair of lines are parallel, perpendicular or neither:
$\mathrm{A}(-4,1), \mathrm{B}(-1,5) \& \mathrm{C}(1,1), \mathrm{B}(5,-1)$

## What should I do?

6.1 Slope of a Line

Read Pages p. 332-339

## Practice Questions

| A | p. 339 \#4-9 (all) | 15 min . |
| :---: | :---: | :---: |
| B | $\begin{gathered} \text { p. } 340 \text { \#11, 13a (i,ii,iii), 15, 17, } \\ 22,23 \mathrm{ac}, 24,26 a b, 28 \end{gathered}$ | 30 min . |

### 6.2 Slopes of Parallel and Perpendicular Lines

## Read Pages p. 344-348

| Practice Questions |  |  |
| :---: | :---: | :---: |
| A | p.349 \#3-6 (all) | 10 min . |
| B | p. 349 \#8bcd, 9ab, 10, 11 abd, 13, | 40 min . |
| C | p. 351 \#22, 23 | 10 min . |

## Checkpoint 1 (p. 352-3)

Review the Connections and Concept Development sections and then try the following Assess Your Understanding questions:

| $\mathbf{5 . 1}$ | p.353 \#1-4 (all) | 20 min. |
| :--- | :--- | :--- |
| $\mathbf{5 . 2}$ | p.353 \#4-7 (all) | 2 |

## Am I ready to move on?

Bring your marked guide and checkpoint work with you when you come to get permission for the LG 12 Quiz.

## MA 10 Learning Guides

## What Am Going to Learn in LG 13?

After this guide you should be able to do the following:

### 6.4 Slope-Intercept Form of the Equation

Identify the slope and y -intercept of $\mathrm{y}=2 \mathrm{x}+3$.

Write an equation with a slope of $\frac{-1}{3}$ and a $y$-intercept of -1 .

Graph the following equation: $y=\frac{-2}{5} x+3$

For the line in the diagram at the right, determine the slope, the $y$-intercept and the equation.

6.5 Slope-Point Form of the Equation

Identify the slope and a point on the line of:

$$
y-2=3(x+3)
$$

Write an equation with a slope of -3 and passing through the point of $(-1,5)$.

Describe the graph of the linear function the following equation: $\mathrm{y}+2=2(\mathrm{x}-4)$

Match the graph at the right with its equation:

$$
\begin{aligned}
& y-3=2(x+1) \\
& y+3=-2(x-1) \\
& y-3=-2(x+1)
\end{aligned}
$$

## Student Directions

### 6.4 Slope-Intercept Form of the Equation

Read Pages p. 357-361

|  | Questions |  |
| :---: | :---: | :---: |
| A | $\begin{aligned} & \hline \text { p. } 362 \text { \#4, 5, } 6 \\ & \text { p. } 362 \# 7 \mathrm{abc}, 8,11,12 \mathrm{bc}, 13,14 \text {, } \\ & \quad 15,16 \mathrm{a}, 17-21 \text { (all) } \\ & \text { p. } 362 \# 21,23 \end{aligned}$ | 15 min . |
| B |  | 40 min . |
| C |  | 5 min . |

### 6.5 Slope-Point Form of the Equation

## Read Pages p. 365-371

| $\|$$\|l\|$ <br> Practice Questions <br> $\mathbf{A}$ p. $372 \# 4,5,6$ <br> B p. $372 \# 7,8,9,11,12,14,19 \mathrm{abc}$, <br> $20,21,23,24$  |
| :--- |

## Checkpoint 2 (p. 375-6)

Review the Connections and Concept Development sections and then try the following Assess Your Understanding questions:

| $\mathbf{6 . 4}$ | p. $376 \# 2$ | 20 min. |
| :--- | :--- | :--- |
| $\mathbf{6 . 5}$ | p. $376 \# 3,4$ | 2 |

## Am I ready to move on?

Bring your marked guide and checkpoint work with you when you come to get permission for the LG 13 Quiz.

## MA 10 Learning Guides

## What Am Going to Learn in LG 14?

After this guide you should be able to do the following:

### 6.6 General Form of the Equation

Identify the form of the following linear equations:
a) $y=2 x+4$
b) $\quad y-2=3(x-1)$
c) $\quad 2 x+3 y=6$
d) $3 x-2 y+6=0$

Write the following equations in general form:
a) $y=2 x+4$
b) $\quad y-2=3(x-1)$
c) $\quad 2 x+3 y=6$

Find the $x$ - and $y$-intercepts of $2 x+3 y=6$.

Write the following in slope-intercept form:
$2 x-5 y=10$

Graph the following and describe the method used:

$$
3 x-4 y-12=0
$$

## Student Directions

### 6.6 General Form of the Equation

Read Pages p. 377-383

| Practice Questions |  |  |
| :---: | :---: | :---: |
| A | $\begin{aligned} & \hline \text { p. } 384 \text { \#4-7 (all) } \\ & \text { p. } 384 \text { \#8, 9i-ab. 10abc. 11b, 12ab } \\ & 13 \mathrm{ab}, 14 \mathrm{ab}, 16 \mathrm{c}, 18,22,23, \\ & 24 \\ & \text { p. } 385 \text { \#26 } \end{aligned}$ | 15 min . |
| B |  | 30 min . |
| C |  | 5 min . |

## Am I ready to move on?

Read the Study Guide on pages 386 \& 387 .

## Review (p.388-390)

Try the following review question

| $\mathbf{6 . 1}$ | p. 388 \#1-5 (all) |  |
| :--- | :--- | :--- |
| $\mathbf{6 . 2}$ | p. 388 \#6-9 (all) |  |
| $\mathbf{6 . 4}$ | p. 389 \#11-14 (all) | 60 min. |
|  | p. $389 \# 16,17 \mathrm{i}, \mathrm{ii}$ ab, $18,19 \mathrm{ab}$ |  |
| $\mathbf{6 . 6}$ | p. $390 \# 21,22,25-28$ (all) |  |

Optional Practice Test (p.391)
p. 391 \#1-5 (all)

25 min.

## How Do I Show My Understanding?

Bring your marked guide work for LG 12, 13 \& 14 and review package with you when you come to get test permission.

## MA 10 Learning Guides

## What Are These Guides About?

- A system of two linear equations is solved when the set of ordered pairs that satisfies both equations is determined.
- Multiplying or dividing the equations in a linear system by a non-zero number, or adding or subtracting the equations, produces an equivalent system.
- A system of two linear equations may have one solution, infinite solutions, or no solutions.

## What New Words Should I Learn?

(These definitions should be added to your Math Journal Glossary)

System of linear equations
Solving by substitution
Infinite

Linear system
Equivalent systems
Coincident lines

## MA 10 Learning Guides

## What Am Going to Learn in LG 15?

After this guide you should be able to do the following:

### 7.1 Developing Systems of Linear Equations

What constitutes a linear system of equations?

Does the following linear system of equations have a solution of $(-1,2)$ ?

$$
\begin{aligned}
& 3 x+2 y=6 \\
& 2 x-4 y=-12
\end{aligned}
$$

7.2 Solving a System of Linear Equations Graphically

Determine the solution of the linear system at the right

Determine the approximate solution of the linear system at the right

Solve the following linear system by graphing:

$$
\begin{aligned}
& x+y=6 \\
& x-2 y=-3
\end{aligned}
$$

## What Should I Do?

7.1 Developing Systems of Linear Equations

Read Pages p. 394-400

$\left\lvert\,$| Practice Questions |  |  |
| :--- | :--- | :--- |
| A p. $401 \# 4,5$ 10 min. <br> B p. $11 \# 6,7,8,10,12,13$ 20 min. |  |  |$.$\right.

### 7.2 Solving a System of Linear Equations Graphically <br> Read Pages p. 403-408

| Practice Questions |  |  |
| :---: | :---: | :---: |
| A | $\begin{aligned} & \text { p. } 409 \text { \#3 } \\ & \text { p. } 409 \text { \#4, } 5(\mathrm{a}-\mathrm{i}, \mathrm{ii}), 6,7 \mathrm{ab}, 10- \\ & 13 \text { all (don’t solve), 14,a, } \\ & 16 \\ & \text { p. } 410 \text { \#17a } 18 \end{aligned}$ | 5 min . |
| B |  | 30 min . |
| C |  | 10 min . |

## Checkpoint 1 (p. 414-5)

Review the Connections and Concept Development sections and then try the following Assess Your Understanding questions:

| $\mathbf{7 . 1}$ | p.415 \#1-2 | 30 min. |
| :---: | :--- | :---: |
| $\mathbf{7 . 3}$ | p. $415 \# 3,5 \mathrm{a}, 6 \mathrm{a}$ |  |

## Am I ready to move on?

Bring your marked guide and checkpoint work with you when you come to get permission for the LG 15 Quiz.

## MA 10 Learning Guides

## What Am Going to Learn in LG 16?

After this guide you should be able to do the following:

### 7.4 Using a Substitution Strategy to Solve a Systems

Use substitution to solve the following linear system.

$$
\begin{aligned}
& y=6-x \\
& 2 x-4 y=-6
\end{aligned}
$$

Identify the two like terms and say how they are related.

$$
\begin{aligned}
& 3 x+4 y=12 \\
& 4 x+2 y=6
\end{aligned}
$$

Use substitution to solve the following linear system.

$$
\begin{aligned}
& \frac{1}{2} x+\frac{2}{3} y=1 \\
& \frac{1}{4} x-\frac{1}{3} y=\frac{5}{2}
\end{aligned}
$$

7.5 Using a Elimination Strategy to Solve a System

Use elimination to solve the following linear system.

$$
\begin{aligned}
& x-4 y=1 \\
& x-2 y=-1
\end{aligned}
$$

Use elimination to solve the following linear system.

$$
6 x-2 y=29
$$

$$
4 x+3 y=1
$$

Use elimination to solve the following linear system.

$$
\begin{aligned}
& 0.03 x+0.15 y=0.027 \\
& -0.05 x-0.5 y=0.05
\end{aligned}
$$

7.6 Properties of Systems of Linear Equations

Determine the number of solutions to the linear system. $2 x-4 y=20$ $4 x-8 y=10$

## What should I do?

7.4 Using a Substitution Strategy to Solve a Systems

Read Pages p. 416-424

|  | Questions |  |
| :---: | :---: | :---: |
| A | $\begin{aligned} & \text { p. } 425 \text { \#4, } 5 \\ & \text { p. } 425 \text { \#6a, } 7 \mathrm{a}, 8 \mathrm{a}, 9 \mathrm{a}, 11,14,15,18, \\ & \quad 19 \mathrm{ac}, 22 \mathrm{a} \\ & \text { p. } 426 \# 27 \\ & \hline \end{aligned}$ | 20 min <br> 45 min . <br> 5 min . |
| B |  |  |
| C |  |  |

7.5 Using a Elimination Strategy to Solve a System

Read Pages p. 428-436

## Practice Questions

| A | p. $437 \# 3,4,5$ |  |
| :---: | :--- | :--- |
| B | p. $437 \# 6 \mathrm{~cd}, 7 \mathrm{~b}, 8,9,12,13,17$, <br> 19 a 20 | 25 min. |
| 30 min. |  |  |

### 7.6 Properties of Systems of Linear Equations

## Read Pages p. 442-447

## Practice Questions

| $\mathbf{A}$ | p. 448 \#4, 5,6 | 15 min. |
| :--- | :--- | :--- |
| B | p. $448 \# 7,9,10-12,14,15,17-20$ | 25 min. |
| $\mathbf{C}$ | p. $449 \# 24 \mathrm{a}$ | 10 min. |

## Am I ready to move on?

Read the Study Guide on pages $450 \& 451$.

## Review (p.452)

Try the following review question

| $\mathbf{7 . 1}$ | p.452 \#2,3 |  |
| :--- | :--- | :--- |
| $\mathbf{7 . 2}$ | p. $452 \# 4-7$ (all) |  |
| ${$$} }$ | p. $453 \# 10,11,12 \mathrm{a}, 14$ | 60 min. |
| ${$$} }$ | p. $454 \# 15,16$ |  |
|  | p. $454 \# 18,20,21$ |  |

| Optional Practice Test (p.455) |  |  |
| :---: | :---: | :---: |
| p.455 \#1-6 (all) | 30 min. |  |

MA 10 Learning Guides
How Do I Show My Understanding?
Bring your marked guide work for LG 15 \& 16 and review package with you when you come to get test permission.

LG TESTS HAVE 3 PARTS:
PART A: MULTIPLE CHOICE
PART B: FREE RESPONSE
PART C: SOLVE \& DESCRIBE.

## MA 10 Learning Guides

## What Are The Big Ideas?

- You will want to go back over the whole course to re-familiarize yourself with all the concepts covered.
- There is a Provincial exam at the end, which is worth $20 \%$ of your overall mark.

## MA 10 Learning Guides

## What Should I Do?

In-Class Review (See your teacher)
Do the in-class review for the Math 10 Provincial Exam with a partner and then hand in your marked review work for LG 17 to your teacher. The mark you receive for this package is you mark for LG 17. There is no test for LG 17. Ask your teacher if you want more review material.

## How Do I Show My Understanding?

You will write the Math 10 Mock Exam on or before the date given to you by your teacher. Good luck! You mark on the Mock Exam is you mark for LG 18.

## What Do I Do Next?

Make sure you go over you Mock Exam with your teacher.

## Am I ready to move on?

If you wish to write a second (different) Mock Exam see you teacher for what extra preparation you will need to do and when you can write the second Mock Exam

## Cumulative Review (p.458)

Try the following review question

| 1 | P. 458 \#1, 2 |  |
| :---: | :---: | :---: |
| 2 | p. 458 \#3, 4 |  |
| 3 | p. 458 \#5, 6 |  |
| 4 | p. 458 \#7-9 | 90 min . |
| 5 | p. 459 \#10-16 |  |
| 6 | p. 460 \#17-24 |  |
| 7 | p. 461 \#25-31 |  |
